## PROJECTS

**Online Car Selling Portal**

- Developed a dynamic website for buying and selling used cars, offering a user-friendly platform for both buyers and sellers.
- Designed the front end using HTML, CSS, JavaScript, and Bootstrap for a responsive UI.
- Implemented back-end logic with PHP for secure user interactions and data processing.
- Integrated an SQL database to manage user accounts, listings, and transactions, ensuring efficient data handling.
- The project improved the online car sales experience, connecting sellers with potential buyers.
